Express Lane Striping

Utah's Express Lanes were originally on 38 miles of I-15 from 500 North in Salt Lake City to University Parkway in Orem. In fall 2008 UDOT added six miles to the system from State Street in Farmington to 200 North in Kaysville. UDOT will continue to expand the Express Lanes incrementally from Kaysville to Spanish Fork as funding allows. Express Lane users may enter or exit the Express Lanes at access points along the corridor, indicated by white dotted striping. These access points are at every interchange and range from 3,000 to 9,000 feet long. This allows plenty of time for vehicles to safely maneuver in and out of the Lane. The striping on the remainder of the Express Lanes will be marked with a double white line, providing a two-foot buffer between the general-purpose and Express Lanes.
